

TECHNICAL BULLETIN

FOAM DESTROYER™ 200

Description:

Foam Destroyer™ 200 is a one hundred percent (100%) solids, non-aqueous, concentrated antifoam compound based on a high molecular weight dimethylpolysiloxane fluid and silica technology. It can be used as a "processing aid" to reduce foam in rendering cooking processes.

Typical Properties:

Property	Characteristic
Appearance	Opaque
Solids Content [%]	Ca. 100
Viscosity	3,000 cps

Note: These figures are intended as a guide and should not be used in preparing specifications.

F.D.A. Status:

Foam Destroyer™ 200 is suitable for indirect food contact under Food and Drug Administration Code of Federal Regulations, Section Nos. 175.300, 176.170, 177.2600, and 178.3400. For specific applications and/ or limitations, please contact TayChem Industries, Ltd.

Storage Stability:

Foam Destroyer™ 200 has a shelf life of at least twelve (12) months if stored in its original, unopened container at 25°C or 70°F.

If this material is kept beyond the recommended shelf life, it is not necessarily unusable, but quality control should be performed on the properties relevant to the application.

Safety Instructions:

Comprehensive instructions are given in the corresponding Material Safety Data Sheet. This information is available upon request from TayChem Industries, Ltd.

Because we cannot foresee or control the varied conditions under which this information and materials may be used, we do not guarantee the applicability or accuracy of this information or the suitability of our materials in any specific situation. Samples are provided and users should make their own tests to determine the suitability of our materials for their specific purposes. This material is provided without warranty, either expressed or implied, of fitness for a specific purpose and nothing herein shall be construed as a recommendation for uses which infringe valid patents or as extending license under valid patents.
